SUBJECT INDEX

0100 Costs

0103 Cost Estimating

Decision-Analytic Methodology for Cost-Benefit Evaluation of Diagnostic Testers; Agogino, Alice M., Ori Nour-Omid, Wayne Imaino, and Sherman S. Wang; March; p. 39.

Age-And-Test Procedures for True Reliability Improvement: Feasibility and Economic Justification; Barber, James S. and Kenneth R. Gehner; November; p. 81.

A Simultaneous Equation Model of Cost/Performance Relationships in Large Scale Computing; Anderson, Evan E. and Yu-Min Chen; November; p. 155.

0104 Cost Reduction Programs

Cost Savings Due to Variance Reduction in a Canning Process; Golhar, Damodar Y. and Stephen M. Pollock; March; p. 89.

0300 Engineering Economics

0301 Cash Flow Analysis

Price Changes and Order Quantities: Impacts of Discount Rate and Storage Costs; Hall, Randolph W.; May; p. 104.

A Simultaneous Equation Model of Cost/Performance Relationships in Large Scale Computing; *Anderson, Evan E. and Yu-Min Chen; November; p. 155.*

0302 Equipment Replacement

A Generalized Multimachine Replacement Model for Flexible Automation Investments; Suresh, Nallan C.; May; p. 131.

0400 Facilities Planning, Design

0405 Plant Layout Analysis

An Integrative Model-Based Approach to Hospital Layout; Butler, Timothy W., Kirk R. Karwan, James R. Sweigart, and Gary R. Reeves; May; p. 144.

The Single Period Stochastic Plant Layout Problem; Rosenblatt, Meir J. and Dean H. Kropp; May; p. 169.

0500 Functional Operations

0504 Maintenance, Plant Engineering

An Improved Policy Iteration Algorithm for Semi-Markov Maintenance Problems; Valdez-Flores, Ciriaco and Richard M. Feldman; March; p. 55.

0600 Human Engineering

0603 Ergonomics

Work Schedules and Body Rhythms; Kroemer, K.H.E.; March; p. 26.

A Study of Slip Potential During Cart Pushing and Pulling; Lee, K. S., D. B. Chaffin, and C. Parks; November; p. 139.

0608 Safety and Health

A Study of Slip Potential During Cart Pushing and Pulling; Lee, K. S., D. B. Chaffin, and C. Parks; November; p. 139.

0900 Industries

0903 Health Care and Other Services

An Integrative Model-Based Approach to Hospital Layout; Butler, Timothy W., Kirk R. Karwan, James R. Sweigart, and Gary R. Reeves; May; p. 144.

0904 Manufacturing

Scheduling and Logistics on Electronics Manufacturing and Assembly: An Introduction; Wilhelm, Wilbert E.; September; p. 2.

Research Directions in Electronics Manufacturing; Wilhelm, Wilbert E. and John Fowler; September; p. 6.

Off-Line Quality Control in Electronics Assembly: Identifying the Critical Problem; Albin, Susan L. and David J. Friedman; November; p. 58.

0905 Other

An Empirical Study on Analyzing the Productivity of Bank Branches; Oral, Muhittin, Ossama Kettani, and Reha Yolalan; November; p. 166.

1000 Management

1003 Decision Making

An Approximate Model for Field Service Territory Planning; Hill, Arthur V., Salvatore T. March, Christopher J. Nachtsheim, and Murali S. Shanker; March; p. 2.

Decision-Analytic Methodology for Cost-Benefit Evaluation of Diagnostic Testers; Agogino, Alice M., Ori Nour-Omid, Wayne Imaino, and Sherman S. Wang; March; p. 39.

Decision Integration Fundamentals in Distributed Manufacturing Topologies; Papastavrou, Jason D. and Shimon Y. Nof; July; p. 27.

A Bayesian Perspective on Taguchi's Approach to Quality Engineering and Tolerance Design; Singpurwalla, Nozer D.; November; p. 18.

A Comparison of the Analytic Hierarchy Process with Multiattribute Utility Theory: A Case Study; Bard, Jonathan F.; November; p. 111.

1200 Methods Engineering

1205 Manufacturing Engineering

Task Decomposition in Cut-Off Dimensioning: A Frame-Based Model; Kacha, Pierre and Colin Moodie; March; p. 11.

The Analysis of a Production Line with Unreliable Machines and Random Processing Times; Hong, Yushin, C. Roger Glassey, and Deokhyun Seong; March; p. 77.

Performance Evaluation of Hybrid Cells; Seifoddini, Hamid; March; p. 84.

A Generalized Multimachine Replacement Model for Flexible Automation Investments; Suresh, Nallan C.; May; p. 131.

Intelligent Scheduling with Machine Learning Capabilities: The Induction of Scheduling Knowledge; Shaw, M. J., S. Park, and N. Raman; May; p. 156.

System Integration in Intelligent Manufacturing: An Introduction; Shaw, Michael J., James J. Solberg, and Tony C. Woo; July; p. 2.

Tautologies, Models and Theories: Can We Find "Laws" of Manufacturing?; Little, John D. C.; July; p. 7.

Modeling of Integrated Manufacturing Systems Using an Object-Oriented Approach; Mize, Joe H., Hemant C. Bhuskute, David B. Pratt, and Manjunath Kamath; July; p. 14.

Decision Integration Fundamentals in Distributed Manufacturing Topologies; Papastavrou, Jason D. and Shimon Y. Nof; July; p. 27.

Integrated Shop Floor Control Using Autonomous Agents; Lin, Grace Yuh-Jiun and James J. Solberg; July; p. 57.

Design of a Knowledge-Based On-Line Simulation System to Control a Manufacturing Shop Floor; Manivannan, S. and Jerry Banks; July; p. 72.

CIMGEN-A Computer Aided Software Engineering Tool for Development of FMS Control Software; Joshi, Sanjay B., Erik G. Mettala, and Richard A. Wysk; July; p. 84.

Design and Manufacturing: An NSF Perspective; Martin-Vega, Louis A.; July; p. 98.

Automated Process Planning for Printed Circuit Card Assembly; McGinnis, L. F., J. C. Ammons, M. Carlyle, L. Cranmer, G. W. Depuy, K. P. Ellis, C. A. Tovey, and H. Xu; September; p. 18.

Feeder Assignment Models for Concurrent Placement Machines; Grotzinger, Stephen; September; p. 31.

A Review of Production Planning and Scheduling Models in the Semiconductor Industry Part I: System Characteristics, Performance Evaluation and Production Planning; Uzsoy, Reha, Chung-Yee Lee, and Louis A. Martin-Vega; September; p. 47.

CONWIP Assembly with Deterministic Processing and Random Outages; Duenyas, Izak and Wallace J. Hopp; September; p. 97.

1300 Quantitative Methods

1301 Mathematical Models

An Approximate Model for Field Service Territory Planning; Hill, Arthur V., Salvatore T. March, Christopher J. Nachtsheim, and Murali S. Shanker; March; p. 2.

The Effect of Initial Inventories in a Two-Echelon System; Gerchak, Yigal and Xin Zhang; March; p. 64.

The Analysis of a Production Line with Unreliable Machines and Random Processing Times; Hong, Yushin, C. Roger Glassey, and Deokhyun Seong; March; p. 77.

Effects of Inventory Miscount and Non-Inclusion of Lead Time Variability on Inventory System Performance; Kumar, Sameer and Sant Arora; May; p. 96.

Algorithms for Scheduling Multi-Level Just-In-Time Production Systems; Miltenburg, John and Gordon Sinnamon; May; p. 121.

A Generalized Multimachine Replacement Model for Flexible Automation Investments; Suresh, Nallan C.; May; p. 131.

The Single Period Stochastic Plant Layout Problem; Rosenblatt, Meir J. and Dean H. Kropp; May; p. 169.

Optimizing Transportation Contracts to Support Just-In-Time Deliveries: The Case of One Contracted Truck per Shipment; Yano, Candace Arai; May; p. 177.

Batch Sequencing; Unal, Ali Tamer and Ali S. Kiran; September; p. 73.

Optimal Inventory Policy for Perishable Items with Time Proportional Demand; Xu, Haiping and Hsu-Pin Wang; November; p. 105.

A Comparison of the Analytic Hierarchy Process with Multiattribute Utility Theory: A Case Study; Bard, Jonathan F.; November; p. 111.

The Optimum Speed of Visual Inspection Using a Random Search Strategy; Morawski, Thomas B., Colin G. Drury, and Mark H. Karwan; November; p. 122.

1303 Programming: Linear, Nonlinear

Design of Acceptance Sampling Plans Under Varying Inspection Error; Shin, Wan S. and Sunil Lingayat; May; p. 111.

An Integrative Model-Based Approach to Hospital Layout; Butler, Timothy W., Kirk R. Karwan, James R. Sweigart, and Gary R. Reeves; May; p. 144.

Feeder Assignment Models for Concurrent Placement Machines; Grotzinger, Stephen; September; p. 31.

On Capacity Modeling for Production Planning with Alternative Machine Types; Leachman, Robert C. and Tali F. Carmon; September; p. 62.

Optimal Burn-In Simulation on Highly Integrated Circuit Systems; Chien, Wei-Ting Kary and Way Kuo; November; p. 33.

1304 Regression Analysis

Time Unit Models for Work Measurement Audits; Pape, Elinor S. and William C. Arnwine; March; p. 70.

Simulation Metamodels of System Availability and Optimum Spare and Repair Units; Madu, Christian N. and Chu-Hua Kuei; November; p. 99.

1305 Simulation/Games

An Approximate Model for Field Service Territory Planning; Hill, Arthur V., Salvatore T. March, Christopher J. Nachtsheim, and Murali S. Shanker; March; p. 2.

The Analysis of a Production Line with Unreliable Machines and Random Processing Times; Hong, Yushin, C. Roger Glassey, and Deokhyun Seong; March; p. 77.

An Integrative Model-Based Approach to Hospital Layout; Butler, Timothy W., Kirk R. Karwan, James R. Sweigart, and Gary R. Reeves; May; p. 144.

Modeling of Integrated Manufacturing Systems Using an Object-Oriented Approach; Mize, Joe H., Hemant C. Bhuskute, David B. Pratt, and Manjunath Kamath; July; p. 14.

Design of a Knowledge-Based On-Line Simulation System to Control a Manufacturing Shop Floor; Manivannan, S. and Jerry Banks; July; p. 72.

Control of Multiproduct Bulk Service Diffusion/Oxidation Processes; Fowler, John W., Gary L. Hogg, and Don T. Phillips; September; p. 84.

CONWIP Assembly with Deterministic Processing and Random Outages; Duenyas, Izak and Wallace J. Hopp; September; p. 97.

Optimal Burn-In Simulation on Highly Integrated Circuit Systems; Chien, Wei-Ting Kary and Way Kuo; November; p. 33.

Simulation Metamodels of System Availability and Optimum Spare and Repair Units; Madu, Christian N. and Chu-Hua Kuei; November; p. 99.

1306 Applied Probability

An Approximate Model for Field Service Territory Planning; Hill, Arthur V., Salvatore T. March, Christopher J. Nachtsheim, and Murali S. Shanker; March; p. 2.

An Improved Policy Iteration Algorithm for Semi-Markov Maintenance Problems; Valdez-Flores, Ciriaco and Richard M. Feldman; March; p. 55.

Cost Savings Due to Variance Reduction in a Canning

Process; Golhar, Damodar Y. and Stephen M. Pollock; March; p. 89.
Integrating Kanban Type Pull Systems and MRP Type Push Systems: Insights from a Markovian Model; Deleersnyder, Jean-Luc, Thom J. Hodgson, Russell E. King, Peter J. O'Grady, and Andreas Savva; July; p. 43.
CONWIP Assembly with Deterministic Processing and Random Outages; Duenyas, Izak and Wallace J. Hopp; September; p. 97.
A Bayesian Perspective on Taguchi's Approach to Quality Engineering and Tolerance Design; Singpurwalla, Nozer D.; November; p. 18.
An Overview of Taguchi Method and Newly Developed Statistical Methods for Robust Design; Tsui, Kwok-Leung; November; p. 44.
Estimating Life Functions of Chi Distribution Using Selected Order Statistics; Ali, M. Masoom, Dale Umbach, and A. K. MD. E. Saleh; November; p. 88.
The Optimum Speed of Visual Inspection Using a Random Search Strategy; Morawski, Thomas B., Colin G. Drury, and Mark H. Karwan; November; p. 122.
A Model for Analysis of Work Sampling Statistics; Pape, Elinor S.; November; p. 134.

1400 Production and Inventory Control

1403 Inventory Control

The Effect of Initial Inventories in a Two-Echelon System; Gerchak, Yigal and Xin Zhang; March; p. 64.
Effects of Inventory Miscount and Non-Inclusion of Lead Time Variability on Inventory System Performance; Kumar, Sameer and Sant Arora; May; p. 96.
Price Changes and Order Quantities: Impacts of Discount Rate and Storage Costs; Hall, Randolph W.; May; p. 104.
Optimizing Transportation Contracts to Support Just-In-Time Deliveries: The Case of One Contracted Truck per Shipment; Yano, Candace Arai; May; p. 177.
Evaluation of Supplier-Restricted Purchasing Options Under Temporary Price Discounts; Aull-Hyde, Rhonda L.; May; p. 184.
Optimal Inventory Policy for Perishable Items with Time Proportional Demand; Xu, Haiping and Hsu-Pin Wang; November; p. 105.

1405 Production Control

Integrating Kanban Type Pull Systems and MRP Type Push Systems: Insights from a Markovian Model; Deleersnyder, Jean-Luc, Thom J. Hodgson, Russell E. King, Peter J. O'Grady, and Andreas Savva; July; p. 43.
Integrated Shop Floor Control Using Autonomous Agents; Lin, Grace Yuh-Jiun and James J. Solberg; July; p. 57.

1406 Production Planning

A Review of Production Planning and Scheduling Models in the Semiconductor Industry Part I: System Characteristics, Performance Evaluation and Production Planning; Uzsoy, Reha, Chung-Yee Lee, and Louis A. Martin-Vega; September; p. 47.
On Capacity Modeling for Production Planning with Alternative Machine Types; Leachman, Robert C. and Tali F. Carmon; September; p. 62.

1407 Production Scheduling

Algorithms for Scheduling Multi-Level Just-In-Time Production Systems; Miltenburg, John and Gordon Sinnamon; May; p. 121.
Intelligent Scheduling with Machine Learning Capabilities: The Induction of Scheduling Knowledge; Shaw, M. J., S. Park, and N. Raman; May; 156.
Integrated Shop Floor Control Using Autonomous Agents; Lin, Grace Yuh-Jiun and James J. Solberg; July; p. 57.
Scheduling and Logistics on Electronics Manufacturing and Assembly: An Introduction; Wilhelm, Wilbert E.; September; p. 2.
Feeder Assignment Models for Concurrent Placement Machines; Grotzinger, Stephen; September; p. 31.
A Review of Production Planning and Scheduling Models in the Semiconductor Industry Part I: System Characteristics, Performance Evaluation and Production Planning; Uzsoy, Reha, Chung-Yee Lee, and Louis A. Martin-Vega; September; p. 47.
Batch Sequencing; Unal, Ali Tamer and Ali S. Kiran; September; p. 73.
Control of Multiproduct Bulk Service Diffusion/Oxidation Processes; Fowler, John W., Gary L. Hogg, and Don T. Phillips; September; p. 84.

1500 Quality Control

1501 Inspection

The Optimum Speed of Visual Inspection Using a Random Search Strategy; Morawski, Thomas B., Colin G. Drury, and Mark H. Karwan; November; p. 122.

1502 Quality Control

Quality Control and Its Application in Production Systems; Elsayed, Elsayed and Duane Dietrich; November; p. 2.
The Use of Statistical Process Control and Design of Experiments in Product and Process Improvement; Montgomery, Douglas C.; November; p. 4.
Off-Line Quality Control in Electronics Assembly: Identifying the Critical Problem; Albin, Susan L. and David J. Friedman; November; p. 58.
Time-Series Investigation of Subsample Mean Charts; Alwan, Layth C. and Darrell Radson; November; p. 66.

1503 Reliability

Optimal Burn-In Simulation on Highly Integrated Circuit Systems; Chien, Wei-Ting Kary and Way Kuo; November; p. 33.
Age-And-Test Procedures for True Reliability Improvement: Feasibility and Economic Justification; Barber, James S. and Kenneth R. Gehner; November; p. 81.
Estimating Life Functions of Chi Distribution Using Selected Order Statistics; Ali, M. Masoom, Dale Umbach, and A. K. MD. E. Saleh; November; p. 88.
A Counter-Intuitive Aspect of Component Importance in Linear Consecutive-k-out-of-n Systems; Zakaria, R. S., H. T. David and Way Kuo; November; p. 147.

1504 Sampling

Design of Acceptance Sampling Plans Under Varying Inspection Error; Shin, Wan S. and Sunil Lingayat; May; p. 111.
Time-Series Investigation of Subsample Mean Charts; Alwan, Layth C. and Darrell Radson; November; p. 66.
A Model for Analysis of Work Sampling Statistics; Pape, Elinor S.; November; p. 134.

1600 Work Measurement

1607 Standards Auditing

Time Unit Models for Work Measurement Audits; Pape, Elinor S. and William C. Arnwine; March; p. 70.

Adjustment of Time Standard Audit Values for MIL-STD-1567A; Pape, Elinor S., William C. Arnwine, and Rita Casavantes; May; p. 153.

1700 Data Processing Systems Design

1704 Information Retrieval

Task Decomposition in Cut-Off Dimensioning: A Frame-Based Model; Kacha, Pierre and Colin Moodie; March; p. 11.

Intelligent Scheduling with Machine Learning Capabilities: The Induction of Scheduling Knowledge; Shaw, M. J., S. Park, and N. Raman; May; 156.

Modeling of Integrated Manufacturing Systems Using an Object-Oriented Approach; Mize, Joe H., Hemant C. Bhuskute, David B. Pratt, and Manjunath Kamath; July; p. 14.

Decision Integration Fundamentals in Distributed Manufacturing Topologies; Papastavrou, Jason D. and Shimon Y. Nof; July; p. 27.

Design of a Knowledge-Based On-Line Simulation System to Control a Manufacturing Shop Floor; Manivannan, S. and Jerry Banks; July; p. 72.

CIMGEN-A Computer Aided Software Engineering Tool for Development of FMS Control Software; Joshi, Sanjay B., Erik G. Mettala, and Richard A. Wysk; July; p. 84.

Automated Process Planning for Printed Circuit Card Assembly; McGinnis, L. F., J. C. Ammons, M. Carlyle, L. Cranmer, G. W. Depuy, K. P. Ellis, C. A. Tovey, and H. Xu; September; p. 18.
